SKILLS

HTML5, CSS3, JavaScript, Python, React, AWS, SQL Databases, MongoDB, Express, Node.js, Test-Driven Development, Selenium, CircleCI, Git, GitHub, RESTful Web Services, Customer Service

Stack Education Web Development Bootcamp   January 2020 – Present
Teaching Assistant & Tutor

- Assist a cohort of 30 students from Worcester State, Framingham State, and St. Joseph's College of Maine with their pursuits of learning full stack web development.
- Provide pair-programming during technical classes and additional tutoring hours.
- Grade assignments and projects and provide feedback on the overall functionality of the code, cleanliness, and explanation of coding and functionality errors.

OPT Industries   Sept 2019 – Jan 2020
Web Development Consultant

- I was the scrum master on an Agile Software Development team where we developed a Node.js web application for customers to upload and view a 3D model and calculate the cost to print it with various materials.
- Implemented clean and consistent UI/UX design and communicated with the lead automation engineer weekly. During meetings my team and I gathered specifications for the project and provided updates on our progress.

Demoulas Market Basket   June 2015 – Sept 2019
Apprentice Meat Cutter

- Even though roughly 6% of Meat Cutters are women at Demoulas, I was given a recommendation by one of the company owners, Madeline Demoula, to be one of 5 women accepted into the meat-cutting program as an Apprentice Butcher.

Andover Surgical Associates   April 2013 – May 2015
Medical Coding/Billing Specialist

- As the only person in the billing department at this practice, I recuperated thousands of dollars by filing appeals for claims that had been denied.
- I billed insurance companies using ICD-10 (Diagnosis) and CPT (Procedure) codes. I used the patient portal software E-clinical Works for all of my administrative tasks.
